RAMÓN ALBERTO CURBALÁN VEGA

Banqueting and Events Management | F&B Operations

MANUAL / OPERATIONS / 00

Operational framework

A repeatable working system: from the initial briefing to documented closure.

MANAGEMENT MODEL

PHASE	FOCUS AND DELIVERABLE
01 · Define	Client requirements, event type, spaces and service scope.
02 · Plan	Room layout, equipment, staff, service scheduling and interdepartmental coordination.
03 · Prepare	Mise en place, equipment checks, space preparation and briefing.
04 · Deliver	Reception, food and beverage service, timing control and issue resolution.
05 · Close	Breakdown, cleaning, replenishment and final area inspection.

Appendix · Checklist and technical glossary

EDITORIAL GUIDANCE

The capacities and timings shown originate from the source document and refer to the establishment described. Validate them against the BEO, approved layout and the property's current standards before each event.

MANUAL / OPERATIONS / 01

Purpose and delivery standards

A reference guide to standardise operations, enhance the guest experience and maintain coordination between departments.

This manual establishes a professional, operational approach to organising events in a hotel. It aims to standardise F&B service preparation and delivery, with particular attention to quality, coordination between departments and control of detail.

Standardisation helps banquets, meetings, coffee breaks and special services follow consistent criteria, regardless of shift or team composition.

Principles of operational management

Standardisation

Visible protocols and sequences so each team knows what it must deliver.

Coordination

Communication between restaurant, kitchen and the departments involved to synchronise services.

Hospitality

Guest care, discretion and service adapted to each format.

Verification

Pre-service checks, timing monitoring and closure with replenishment.

Hotel space ·

APPLICATION

Review the manual periodically to incorporate products, configurations and service standards authorised by the establishment.

MANUAL / OPERATIONS / 02

Spaces and operational capacity

Functional area inventory: the space determines flows, service sequence and resource requirements.

ZONE 01 / BALLROOM

The ballroom combines three complementary operational spaces: reception, main room and exterior area. Zoning separates the welcome, celebration and service movements.

SUBAREA	FUNCTION / REQUIREMENT
Entrance and foyer	Coffee breaks, receptions, party bars and, for some events, a dance area.
Main room	Approximate capacity: 120 people seated at tables of eight. Weddings, presentations, conferences, conventions and celebrations.
Exterior area	Outdoor events, receptions and cocktail parties; a fixed bar is available.

Ballroom · original visual room reference

CONTROL POINT

Before confirming setup, check authorised occupancy, service routes, emergency access and compatibility between room, furniture and event configuration.

MANUAL / OPERATIONS / 02.1

Resident and Ses Oliveres areas

Meeting and social hospitality spaces with distinct operational needs.

AREA	OPERATIONAL DESCRIPTION
Resident	Conference, meeting and coffee break rooms; restaurant for approximately 80 people, with live cooking and a Mallorcan-style interior courtyard.
Ses Oliveres	Central courtyard ideal for receptions, welcome drinks, wedding ceremonies, performances and other outdoor social events.

Resident area · original service station image

Ses Oliveres · original food service reference

TECHNICAL CONSIDERATIONS

Space selection determines electricity and water points, back-of-house (BOH) location, station distribution, extra staffing needs and outdoor contingency plans.

MANUAL / OPERATIONS / 03

Event types

Classification by client purpose and production requirements.

An event is a planned activity to fulfil a specific business, social, cultural or gastronomic objective. This classification defines room preparation, transitions and the service model.

TYPE	FORMATS INCLUDED
Corporate	Conferences, conventions, congresses, meetings and team-building activities.
Gastronomic	Business breakfasts, lunches and dinners, buffets, brunches, cocktail parties, receptions and galas.
Cultural	Events related to art, culture and beliefs, and activities by companies specialising in promotional marketing.
Social celebrations	Weddings, anniversaries, birthdays, club dinners and commemorative gatherings.

ORIGINAL VISUAL DOCUMENTATION

Original event-type diagram,

OPERATIONAL APPLICATION

Reflect the event type in the event programme and production instructions: schedule, spatial configuration, service points, resources and the person responsible for each milestone.

MANUAL / OPERATIONS / 04

Food and beverage service formats

The format defines service pace, resource allocation and guest movement.

Banquets and celebration meals

A banquet is an organised food service for a special private or corporate occasion. It features an agreed menu, a structured schedule and a uniform setup supported by coordinated staff.

- Typical sequence: aperitif, starter, main course, dessert and coffee.
- Lunches and dinners may include a 20-30 minute welcome drink or reception aperitif, where planned.
- The menu may include one or two main courses, dessert and coffee, as contracted.

Cocktail reception

A dynamic format encouraging interaction: standing guests, drinks and food served on trays, with optional high tables or food stations.

Coffee break

A mid-morning or afternoon break between work sessions. Includes coffee, tea, water, juices and pastries or savoury snacks; locate the station near the rooms to minimise travel.

Buffet

Self-service presentation of hot and cold food. Requires organised guest flow, avoidance of bottlenecks, replenishment and temperature supervision.

TECHNICAL CONSIDERATIONS

The event order should record format, guest count, duration, dietary requirements, number of stations and replenishment responsibilities. These are recommended planning fields, not mandatory figures from the source document.

MANUAL / OPERATIONS / 05

Mise en place and preparation

Pre-event preparation checks resources before setting up the room.

T-1 CONTROL / ADVANCE PREPARATION

CATEGORY	OPERATIONAL CHECK
Cutlery	Polished pieces sorted for starter, main course, dessert and coffee.
Glassware	Spotless water, white wine, red wine, cava and supplementary glasses.
Crockery and serviceware	Charger, service and bread plates, sauce boats and additional items.
Furniture	Tables, chairs, side tables, lectern and buffet stations as required.
Drinks and coffee service	Wines, water, soft drinks, coffee, teas and bar equipment.
Room	Check cleanliness, lighting, air conditioning, access and emergency exits.

Table configuration

Table standards adapt to the menu and the hotel's service identity. The source document includes:

- Charger or presentation plate and bread plate with knife.
- Aligned water, white wine and red wine glasses.
- Starter, main course and dessert forks.
- Starter, main course and bread knives; soup or dessert spoon depending on the menu.
- Napkin and decorative serviceware according to the establishment's standard.

Banquet table ·

MANUAL / OPERATIONS / 06

Briefing and service sequence

Delivery requires assigned roles, consistent information and communication with the kitchen.

PRE-SERVICE MEETING / T-30 MIN

Hold a team briefing 30 minutes before the event to review format, guest count and timings, assign positions and sections, synchronise dish release with the kitchen and check allergies, intolerances and special menus.

STAGE	CONTROL ACTION
Reception	Welcome, drinks preparation and aperitif service if a welcome drink is included.
Transition	After the aperitif, escort guests to their assigned tables.
Drinks	Water and wine service according to menu, pairing or guest preference.
Food	Allocate restaurant sections and coordinate dish service and beverage attention.
During service	Discreet seating checks, removal of unnecessary serviceware and dessert preparation.
Dessert and coffee	Follow the schedule; take coffee/tea orders and coordinate with bar or service pantry.

FOH-BOH INTEGRATION

FOH (front of house): guest service and attention. BOH (back of house): kitchen, service pantry and support routes. This distinction defines responsibilities, communications and handover points during service.

Milestones to establish in the briefing

- Reception and welcome.
- Drinks and aperitif.
- Sequential service of starter, main course, dessert and coffees.

MANUAL / OPERATIONS / 06.1

Closure, breakdown and replenishment

Ending the event includes returning the space to a safe operational condition, ready for the next service.

01 · Clearing

Remove crockery, glassware and cutlery for cleaning and sorting.

02 · Linen

Remove table linen and send it through the laundry process.

03 · Furniture

Collect, organise and sort tables, chairs and support items.

04 · Final inspection

Check lost property, overall cleanliness and replenishment of used materials.

POST-EVENT MANAGEMENT

METHODOLOGICAL SUPPORT

As a complementary good practice, record incidents, timing deviations and maintenance needs in the closing report. The source covers breakdown and replenishment but does not prescribe a reporting template.

Operational closure is part of quality control: it ensures continuity between services and identifies resources awaiting replenishment.

MANUAL / OPERATIONS / 07

Coffee breaks and welcome drinks

Standardising stations, replenishment and guest reception.

Coffee break · station setup

- Cups, saucers and teaspoons; coffee machine and milk/water warmers.
- Capsule dispenser or filter coffee machine; selection of teas and infusions.
- Water glasses, jugs, bottles, sugar, sweeteners, milk and accompaniments.
- If food is served: a table with pastries, mini sandwiches or agreed items; tongs, spoons, plates, napkins and identifying labels.

Service procedure

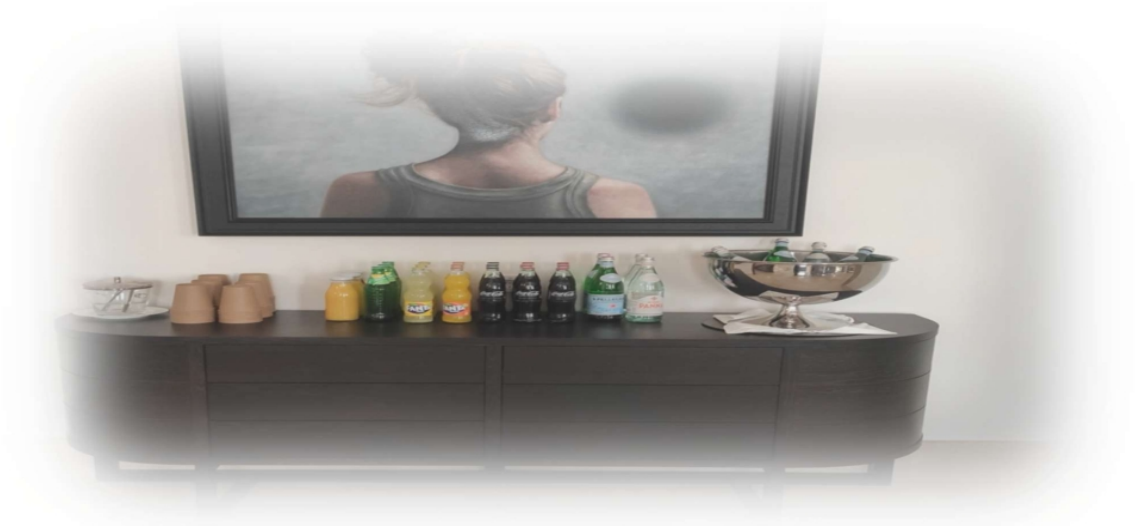

- Prepare the area sufficiently ahead of the agreed time.
- Check hot-drink temperatures before starting.
- Maintain replenishment throughout service.
- Close in coordination with the meeting schedule without delaying its agenda.

Welcome drinks · reception

Provide white wine, red wine, beer and cava; prepare soft drinks and water on request, and aperitif trays with cocktail napkins.

- The source specifies preparing tray-service glasses five minutes before guest arrival.

- Welcome guests with drinks trays at the event entrance.
- Aperitif service begins approximately five minutes after reception starts.

Coffee break station ·

MANUAL / OPERATIONS / 08

Meeting rooms and configurations

A functional setup combines hospitality, audiovisual equipment and a layout suited to the working format.

Standard equipment

- Folder, paper and pen for each participant.
- Coaster, glass and bottle of water per person.
- A central bowl of sweets or chocolates, according to the planned standard.
- Requested materials and equipment: a Clipshare-type wireless presentation system; flipchart with paper and red, blue, green and black markers.

Layout types

CONFIGURATION	GENERAL APPLICATION
Classroom	Tables facing the presentation area for presentations and individual work.
Closed classroom	Classroom variation adapted to occupancy and circulation requirements.
Theatre	Rows of seats for presentations and audiences.
Boardroom	Central table for executive or formal meetings.
U-shape / horseshoe	Layout supporting participant visibility and conversation.
Custom	Combinations based on the briefing and specific client requirements.

Meeting room / ballroom ·

MANUAL / OPERATIONS / 09

Setup references and final control

Examples are configuration references, not automatic approval of occupancy or distribution.

Banqueting · ballroom

The source describes ten round tables, 1.80 m in diameter, with eight chairs each; indicative spacing is 1.5 m between tables and 80 cm between chairs.

80

Guests in the example: 10 tables × 8 seats. This reference layout differs from the room's approximate overall capacity (120 guests).

Preserve emergency exits, staff circulation and access between kitchen and ballroom. The example distances do not replace applicable safety and accessibility checks.

Restaurant setups

The document mentions standard and special configurations in spaces such as Ca Nostra and Rocka, adapted to guest numbers and the contracted buffet, set-menu or cocktail service.

Special setups

For galas, themed events and personalised services, develop the design according to the briefing and hotel standards.

PRIOR VALIDATION

Before issuing the final layout, confirm available furniture, routes, occupancy, technical requirements and transition timings with the managers of the areas involved.

APPENDICES / A

Reusable operational checklist

An additional tool based on the procedures described in the source manual.

PRE-PRODUCTION

- ☐ Briefing and event order reviewed with the departments involved.
- ☐ Attendance, menu and special requirements confirmed.
- ☐ Setup plan and room routes verified.
- ☐ Furniture, serviceware, drinks and support station prepared.
- ☐ Lighting, cleanliness, air conditioning and access checked.

DELIVERY

- ☐ Team in position and pre-service briefing completed.
- ☐ Kitchen and restaurant aligned on service milestones.
- ☐ Reception and drinks sequence verified.
- ☐ Allergies, intolerances and special menus communicated.
- ☐ Replenishment and issue handling controlled.

POST-EVENT

- ☐ Crockery, glassware, cutlery and linen removed.
- ☐ Furniture sorted and area inspected.
- ☐ Materials replenished and closing observations recorded.

RECOMMENDED USE

This checklist is an editorial aid to applying the procedures; it is not a separate form in the original PDF.

INDICATOR	WHAT TO OBSERVE
Punctuality	Deviations from reception and dish-service schedules.
Consistency	Compliance with mise en place and the defined sequence.
Service	Guest-service incidents and their resolution.
Replenishment	Product availability throughout coffee breaks and buffets.

Suggested monitoring criteria

APPENDICES / B

Glossary and document traceability

Terminology used in banqueting operations.

TERM	PROFESSIONAL USE
BEO	Banquet Event Order: event sheet/order providing coordinated production information.
Mise en place	Technical preparation of equipment and service space before an event.
Layout	Spatial plan showing tables, stations, access and circulation.
Briefing	Pre-service alignment meeting to distribute information and responsibilities.
Timing / run of show	Schedule of milestones and the pace of event delivery.
Seating	Planned guest allocation or distribution within the room.
FOH / BOH	Guest-facing areas / operational support and production areas.
Service pantry	Service support and coordination area near the restaurant.
